

A mobile facility auditing, database and reporting program designed for sport to better assess and understand levels of facility provision, condition, compliance and risk.

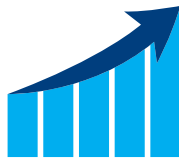

CREATING BENEFITS FOR SPORT AND ASSET OWNERS

Build strategy
& infrastructure
investment
platforms

Deliver stakeholder
& industry
connectivity

Improve
data quality
access & use

Drive venue
management
& provision
standards

Realise the
value of
facility data

Intergrate systems
to create
powerful
analytics

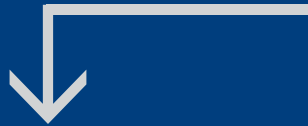

A POWERFUL INDUSTRY PLANNING TOOL THAT:

- Helps stakeholders to better understand existing sporting assets
- Connects facility supply with current use and projected demand
- Builds organisational knowledge and industry capacity
- Measures provision against documented standards and requirements
- Monitors and evaluates the changing facility landscape
- Delivers national consistency in reporting and analysis from local data capture
- Justifies and prioritises investment into facility renewal and development
- Provides a live updating online system for instant reporting and analysis
- Highlights management, capacity, usage and access inefficiencies
- Connects to GIS and data analytics to create evidence based decision making

1. LOCATE

Upload existing site information and locate sites using GPS coordinates

5. PRIORITISE

Utilise data and reporting to prioritise and advocate for funding and resources

2. AUDIT

In-field auditing using mobile technology with photographic evidence

4. REPORT

Clear and instant reporting outputs with customised filters and queries

3. ANALYSE

Statistical analysis, graphs and Excel exports to analyse provision, capacity, compliance and risk
