AFL NATIONAL AUDIT PROGRAM

The AFL National Audit Program saw the development of a facility database using insideEDGE's Sports Facility Auditor Program (SFA).

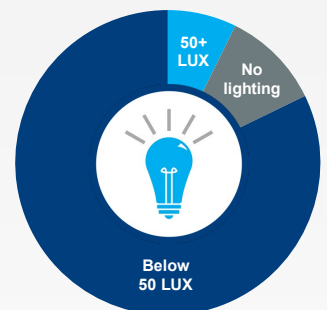

SFA-AFL provides us with onsite auditing capability and allows all of our regional, state-territory and national staff to assess venue provision and conditions, and identify facility investment requirements to meet current and future demand.

The use of SFA-AFL and the ongoing access to up-to-date data has enhanced our planning significantly and provides our sport with a fantastic data resource that ultimately supports clubs, leagues and local councils to meet the needs of the football communities they represent. **Ken Gannon, National Facility Manager, AFL**
